

within  
the  
cycles  
of  
life...  
of  
cycles...  
of  
energy...

the end  
is the beginning  
and the beginning  
is the end

**We are what we believe and are much safer when we know.**

religions, psychology, philosophies, ontology, cybernetics, mysticism, astrology, education, self-hypnosis, occultism, and politics

There is only energy  
Within the context of energy vibes.  
Change is the only permanent condition  
Within the context of change,  
the image, the symbol, is the  
organizing principle of conceptual identity.  
Within the context  
of images and symbols...

ICONICS = science-knowledge of images  
and since consciousness is the product of  
images and symbols of associative feelings  
with knowledge-wisdom as the composite  
understanding of these... ICONICS becomes:  
the science of knowing, the knowledge of images  
the imagination of reality, the realization of actuality  
the actual nature of consciousness...  
which is simply a feedback mechanism of  
associative inputs-intuits-ingrams-constructs of  
patterned knowing... i.e. of images and symbols

**THE ICON IS THE ORGANIZING PRINCIPLE OF ESSENTIAL CONCEPTUAL IDENTITY**

It has been said that a picture is worth a  
thousand words; the icon simplifies to a  
meaningful few. It has also been said that  
man's created identity is of the image  
of **God-Krishna-Om**... and that this image,  
this organizational principle, this harmonious  
orientation within space and time is man's  
**self-concept**... his **self-image**.  
Man thinks... and therefore is...  
what he thinks... **HE IS.**

It's not where we are, but what we do where we are.  
in this ocean of vibrational actuality  
which we subjugate as reality.  
It's not where we look, but what we look for  
for we see-know what we want to see...  
and can do as much as we know-see.  
When we look for **BOVD** we encourage **IT**.  
When we understand **BOVD** we are... **IT**.  
from now to now
