

Our nervous system is the primary system relating our soul self world to the external reality. Through the sensory apparatus such as eyes, pain receptors, heat receptors, etc. we are connected to the outside. These apparatus upon stimulation produce an electrical flow in the nerves attached to it. This flow then activates our brain and spine, informing us of changes occurring. We react to the changes in open new ways if we have freed ourselves of the fetters of our fathers' frustration. This electrical flow is an energy flow carried by electrons whose consistency is primarily energy, not much matter at all.

Our bodies also contain emitters of energy. Our bodies are manifestations of energy. And the well being of the spirit they enclose is transmitted through this  $E = MC^2$  matter we are vibrating. Each of us to our eyes is energy vibrating at a multitude of frequencies of energy.  $E = hv$   
 $hv = MC^2$

The energy of your soul self source flows out through matter into the universal medium of matter. Molecules flow into each other. Caress each other with vibrations of love.

What we're working toward now in this new age with the use of electronics is extending our nervous systems to a global, a universal and ultimately a cosmic scale through the use of tools. We have audio tape recorders, VTR's and computers. All these things use the same kind of flow as our closest tool: our nervous system. The structures are different mainly because we are at a primitive stage in developing our system toward their biological counterparts.

What we're talking about is tapping our psychic energy through our body through our nervous system out of our body into an external system which carries information—energy in a way similar to our nervous system's flow.

Videotape is a tool for us to use in increasing our flow on a rudimentary level. It is probably right now the best tool outside our bodies because it transfers energy efficiently (closer to natural nervous system process) and encompasses the two spectrums of energy to which our bodies are well attuned: sound and light. A new tool not connected to the material world alone but pulsing with energies closer to the nonmaterial realm of electromagnetic awareness. But still, these whirring magnetic marvels are inert energy drains which require external inputs on all levels to sustain them. They are tools to transmit ourselves through. Machines can never match the capability of a human being as a communications medium. You are the medium. You, a living being, have a much greater capacity for energy emission and reception on multiple levels, even levels which we haven't been capable of measuring. A machine loses energy in the process of transference between the source and the recipient. There's just no way around this particular generation gap. Machines are inert systems

*Energy sucking systems.*

*Machines have enamored us*

*awed us*

*seduced us*

*into lives which are oiled by*

*their own offspring of worthless goods.*

*We started with them years ago*

*some we worshipped, others saved our time*

*Soon we ended up in lines-*

*on conveyor belts belching and farting*

*We are not machines, we are not inert things*

*We are the sources of the life force.*

*When our bodies love our mind and soul,*

*When we listen to silence. When we love all. Accept, humble and ask not of others but of ourselves.*

*Not relating to those programed thought patterns*

*provided us by those who would have us worship*

*and love matter alone.*
