The following design offers the possibility for audience participation on a voluntary basis in on going multi-camera video productions which are presented live to the audience or taped for later editing and/or playback. Switching capabilities allow for presentation of pretaped programming from the studio and elsewhere while video production continues. The major features of this complete video facility include the following: a public viewing space combining cafe setting and platforms with comfortable foam cushions; a video studio space with remote control auto-focus/auto-zoom cameras, dimmer switch lighting, monitors for participant feedback seating platforms for those waiting to enter the activities; a control room containing camera monitoring, audio facilities, switching and special effects capabilities, editing and tape storage, and programming distribution facilities; additional space serves as small editing, duplication and viewing rooms, a pantry and space for office and tape packaging and shipping.
